Program

All teachers ask questions every day. Literally hundreds of them. How, when, and what questions are posed in your classroom is critical. This is not another sit and get about DOK and levels of questions. Your day will be packed with relevant, useful, and proven strategies that anyone can implement immediately. Everything you learn today can be used in your classroom tomorrow. You have questions about questioning? Connie Hamilton will help you find your answers. Learning Intentions: - Pose questions that reduce disengagement. - Reduce "I don't know" responses in your classroom. - Support student centered learning with questioning methods. - Scaffold student learning through a sequence of questions. - Invite risk-taking by creating a culture of safety in responding to questions.

This learning opportunity is being offered through a grant from Alberta Education.

Presenters

Connie Hamilton

Connie Hamilton is the author of Hacking Questions. She has been a teacher, instructional coach, principal, and district leader in her 20+ years in education. Connie models the same strategies in her workshops that she encourages teachers to use in their classrooms. Her message is clear, realistic, and relevant to educators across grade levels and content areas.

Registration Notes

Registration includes a continental breakfast and lunch. Participants will also receive a copy of the Book "Hacking Questions: 11 Answers That Create a Culture of Inquiry in Your Classroom".
